EnterpriseTECH 2026-27 (Cohort 20)

ENTERPRISE TECH INVENTOR CALL

Explore the commercial feasibility of your technology through the structured analysis of a dedicated team.

Entrepreneurship Centre

UNIVERSITY OF CAMBRIDGE
Judge Business School

Submit your project to explore the commercial potential of your technology and gain fresh insights from talented, entrepreneurial participants.

What is EnterpriseTECH?

EnterpriseTECH is a transformative 10-week educational programme for PhD students, postdocs, and industry professionals, designed to bridge the gap between research and entrepreneurship.

Through lectures, workshops, and project-based learning, participants develop essential entrepreneurial skills and a deep understanding of the commercialisation process.

What does this mean for inventors?

Inventors are invited to submit their projects to explore the commercial potential of their technology with a dedicated team and business supervisor who can help them define a clear path to market.

If your project is selected, a multidisciplinary team will deliver a detailed commercial feasibility report, providing actionable insights and recommendations to help shape the future of your innovation.

What kind of projects are suitable?

We look for intellectually stimulating and innovative projects that align with the areas of expertise of our students. We accept around 20-25 projects a year. Most of our projects come from academics, early-stage startups, and industry partners.

Health-focused projects such as:

- AI-powered biofeedback platform for pelvic health.
- Bioelectronic organ on chip.
- Smart textile electrode arrays for non-invasive electrophysiology mapping and diagnosis.
- Frozen tissue extraction tools for precision medicine.

Earth-focused projects such as:

- High-value porous silicon for battery anodes.
- Adaptive floating seals for clean energy turbo machinery.
- Commercial vascular self-healing concrete.
- Carbon capture battery.

INVENTOR CALL - SUBMIT A PROJECT PROPOSAL

Explore the commercial potential of your technology.

Curious if your research results or early-stage technology have market potential? Interested in exploring new applications or markets?

Opportunities for Inventors:

- Kickstart a new business or accelerate bringing your early-stage tech to market.
- Gain insights and market research from a high-calibre multidisciplinary team.
- Receive customer and market feedback on your invention.
- Clarify your product or service vision with fresh perspectives.
- Build valuable business networks and connections.
- Receive a **commercial feasibility report** and **video**.
- Benefit from a free IP review.

If your project is selected, you will need to:

- Attend the Programme Launch.
- Convene regular meetings with the team.
- Attend the Programme Finale to support the student team.

EnterpriseTECH Cohort 20

26 January – 14 April 2027.
Application deadline: **8 November 2026**.
